

City of Badger Residents

The Badger City Council is considering changing the service provider for Garbage collection in Badger.

Council has contacted and received pricing from another provider and is seeking public input.

The new provider would furnish 96 gallon containers to each household. These containers have wheels and are similar to ones you would see in Fort Dodge and other cities. (Businesses would also be able to obtain dumpsters through them, with a locking feature on the container.) This provider would also supply the city with a different recycling bin with more room for cardboard in it.

In order to contract with this provider, Council would need to raise garbage rates to \$12 or \$13 per residence, regardless of household size, but the added conveniences this provider offers may offset the price increase.

The City is asking residents to let us know your opinion on this prior to the August council meeting when a decision will be made to either switch providers or remain with our current garbage service.

Please email cityofbadger@wccta.net, visit our website at cityofbadger.com and send us a message, or drop off comments in the payment drop box at City Hall.

Thank you!
